Dear Governor Cooper,

The power grid in Virginia must be modernized to meet our growing energy needs now and in the future. I'm asking you to support the bipartisan Grid Transformation and Security Act that will save Dominion Energy customers \$1 billion, and ensure economic benefits and reinvestment in the grid to:

- Reduce outages
- Allow for faster restoration
- Incorporate more renewable energy
- Improve physical and cyber security

The electric grid is the lifeblood of Virginia's economy. We cannot delay improving infrastructure and security through a transformed, smart energy grid that meets our modern energy needs. As your constituent, I urge you to support the Grid Transformation and Security Act.

Regards,  
Carol Fodrie
